EDUCATION

Fairfield University, Fairfield, CT

Expected December 2026

Master of Business Administration & Master of Science in Business Analytics, GPA: 3.6

Fairfield University, Fairfield, CT

May 2025

Bachelor of Science (BS) in Computer Science, cum laude, GPA: 3.65

Minors in Mathematics & Business Analytics

Member, Upsilon Pi Epsilon — international honor society for computing

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, R, C++, Java
- **Data & Analytics Tools:** Google Analytics, Tableau, Snowflake
- **AI & Productivity Tools:** Microsoft Copilot, Claude, Snowflake Cortex
- **Productivity Tools:** Word, Excel, PowerPoint, and Rally

WORK EXPERIENCE

Business Intelligence Analyst Intern, The Hartford

June 2025 - August 2026

- Built a cost-benefit model in Excel using historical claims data (frequency, onsite activity, costs) to estimate avoided losses from onsite services, directly informing leadership's program renewal decision.
- Automated biweekly and monthly reporting by migrating manual Excel processes into Tableau dashboards connected to Snowflake, cutting reporting time by ~90%.
- Built a Tableau executive dashboard integrating 3,000+ prospective clients and analyzing 9,000+ outreach and follow-up records to track pipeline conversion, plus a companion cancellation-analysis dashboard identifying key drop-off drivers.
- Developed a SQL script to reconcile forms data across dual systems, surfacing and resolving thousands of unmatched controls to improve overall data usability and reliability.
- Designed 5+ Tableau dashboards for the Client Service Team covering new business, account retention, top clients, and regional activity, reducing a 20+ hour manual reporting process.
- Applied logistic regression, standardized coefficients, and a likelihood ratio test to identify key operational drivers of program adoption, informing a leadership recommendation on where to focus operational effort.
- Developed an automated customer adoption forecasting model in Tableau used by leadership, replacing a manual, static assumption-based process with dynamic projections driven by live program performance data.

Investment Banking Analyst Intern, Trident M&A Advisors

June 2024 - August 2024

- Sourced and evaluated 1,000+ prospective acquisition targets using SourceScrub, a private company database, supporting the firm's deal pipeline.
- Streamlined prospective client outreach by designing Excel mail merge workflows, improving the efficiency of email communications.

PROJECTS

andreweglevsky.com

March Madness Predictive Analytics Dashboard, Personal Project

- Built an interactive web app that pulls live NCAA basketball data and calculates advanced performance metrics to compare any two teams side by side.
- Developed an opponent-adjusted efficiency model using regular-season Division I game data, incorporating opponent strength, pace, home-court advantage, and probability calibration to project head-to-head NCAA Tournament matchups.

MLB Daily Home Run Predictor, Personal Project

- Built and deployed a Python web app that ranks every hitter in today's MLB starting lineups by home run likelihood, combining season power, recent form, opposing pitcher matchup, bullpen strength, and ballpark factors.
- Integrated three live data sources (Baseball Savant Statcast, Baseball Reference, MLB Stats API) and implemented caching to keep the interface responsive across daily lineup updates.
